

# From Precision Machining to Large-Scale Fabrication...

**The CUSTOM GROUP Offers an Unmatched Scope of Services!**

Custom Engineering is an ISO qualified supplier of contract machining and fabricating services manufacturing components up to 160,000 lbs. With more than 80 certified welders including ASME and AWS welding, produce short and long run components at our campus with over 200,000 square feet of manufacturing space. Our customers include the Defense, Power Generation, Transportation, Oil & Gas, Construction, Forest Products and Mining industries.

Venango is a full service contract manufacturer dedicated to servicing the complete machining needs of our customers. Our reputation for quality machining upholds Venango tradition of excellence in rotary and surface grinding, deep hole drilling, planer milling and horizontal boring. The quality of our service is reflected in the lasting client relationships we have generated since 1954. Our promise to you is superior work, good value and on-time delivery....on-budget.

Lamjen is an ISO 9001:2008 certified, full service, contract machine shop specializing in prototype through long run manufacturing. With turning and milling capabilities from 1/2" to 50" along with our experienced work force, makes Lamjen your source for close tolerance machining of ferrous and non-ferrous materials. We serve Transportation, Oil & Gas, Boiler, Power Generation and Transit industries.
